

“SDP

Support don't Punish 2021, in Porto, has its main focus on building dialogues and new bridges between people that use drugs and the drug-specialized-centers for integrated answers, that are the main focal points for the entrance of people that use drugs in health system. We have been consulting community and some specific groups inside community of People who use drugs like to find out to which extent services that exist are sensitive to women and non-binary people and sex workers needs or not?

How would a community-led safe space should look like?

And, so, our idea is to organize information and examples and produce a document that could systematise the points of view and inputs from community and have the commitment with the services through a partnership that will account that these thoughts and inputs are listened to, reflected upon and hopefully they will lead to the creation of a safe space in Porto that is sensitive to specific needs of different users.”
